INTELLIGENT ELECTRIC HYBRID - RULE THE CITY STREETS

A new breed of SUVs has arrived. A breed that's as silent as the night and refined to perfection with intelligence. Every drive in it is a breath of fresh air. And it's here to rule every road, efficiently. This is the Advanced Grand Vitara with the revolutionary Intelligent Electric Hybrid System.

The advanced Intelligent Electric Hybrid System from Maruti Suzuki is a strong hybrid technology that can drive on battery power, alone, and operate in fuel efficient, zero-emissions mode.

As per MSIL internal testing standards and conditions, the advanced Grand Vitara has a range of 1200 km¹ on a single tank of fuel. Maruti Suzuki claims that it is India's most fuel efficient SUV².

The Intelligent Electric Hybrid system switches automatically between pure electric and petrol modes, as well as a hybrid mode depending on the driving situations, making for a unique experience. And resulting in:

- Better fuel efficiency
- Quieter driving
- No range anxiety
- Enhanced performance
- Lower CO₂ emissions

| SUZUKI ALLGRIP SELECT -RULE WITH A FIRM GRIP

Challenging conditions or new territories - conquer them all. Old conventions, defy them all. Go further and take on the toughest of roads. No matter where the paths take you, rule every road. This is the Advanced Grand Vitara with Suzuki AllGrip Select, the legendary four-wheel drive technology from Suzuki.

The electronically controlled four-wheel drive system with selectable driving modes uses a simple push-and-turn dial so you can control the driving behaviour depending on the road surfaces or conditions. This superior capability of the new breed of SUVs gives the driver the confidence to take on any challenging terrain while ensuring high fuel efficiency and peace of mind. The AllGrip Select lets you choose from 4 driving modes - Auto, Sport, Snow and Lock.

- In AUTO mode, the vehicle prioritises fuel economy and switches between two-wheel drive and four-wheel drive depending on the road surface and driving conditions.
- In SPORT mode, the vehicle is optimised for sporty driving, such as on winding roads.
- In SNOW mode, stability is maximised which makes driving through snow, unpaved or other slippery surfaces easier.
- In LOCK mode, torque is distributed to all four wheels equally, to maximise traction when driving on tough surfaces.
